

SF - 333 4TH FLOOR

1. Layout nodes
2. route finding through nodes  
↳ recursive search w/o dupes, can have circular
3. Showing directions
4. getting distances and directions?

edge  
links  
properties: distance &  
xy coords  
nodes connected

Nodes  
properties: links  
: destinations

plot on top of ~~image~~ image for multi floor navigation.

only need 2 images at most? not sure...

1. Create a jpeg and 0,0 all of the floors.
2. Find some kind of mapping for meters to pixels
3. Make nodes and edges with appropriate lengths
4. Add xy coords for edges
5. Plot path on jpeg

how to A\* path finding multiple floors?
